A.D. 1874, 11th NOVEMBER. N° 3894.

Antiseptic Paper.

(Provisional Protection not allowed.)

PROVISIONAL SPECIFICATION left by Herbert William Hart at the Office of the Commissioners of Patents, with his Petition, on the 11th November 1874.

I, HERBERT WILLIAM HART, of Sackville Street, Piccadilly, in the County of Middlesex, "Professor of the Antiseptic and Dietetic Treatment of Disease," do hereby declare the nature of the said Invention for "IMPROVEMENTS IN THE PREPARATION OF ANTISEPTIC PAPER FOR 'CABINET' AND OTHER PURPOSES," to be as follows:—

My said Invention relates to paper prepared in a peculiar manner for use in cabinets or water or other closets and for similar purposes. This paper is prepared in the following manner:—I take any soft paper which is free from substances that would irritate or injure the anal tube or adjacent parts, and coat the same with a lubricative compound consisting preferably of the following ingredients, namely, spermaceti wax and camphor. Or the compound may consist of camphor mixed with other suitable lubricating substances. This composition is applied to the surface of the paper, and must have such a consistency that when the paper is used the warmth of the body will soften the composition thereon, and the same will have a lubricating and antiseptic effect.
